

Safety Audit of a Heater Decoke

Chris Boase

Todd Lingbloom

The Eveready Advantage

- **Safety**- All our safety guidelines meet and exceed legal requirements
- **Maximize production**- Effective tube cleaning means your facility will run at maximum efficiency
- **Minimize downtime**- Together we can minimize turnaround time, and help extend run lengths.
- **Confidence**- We have proven pigging procedures, and create ones specific for your project, allowing work to quickly get back on course should problems arise
- **Environmentally friendly**- Pigging is a completely self-contained, water based process, so no waste enters the environment

Auditing a contractor in a refinery, to see

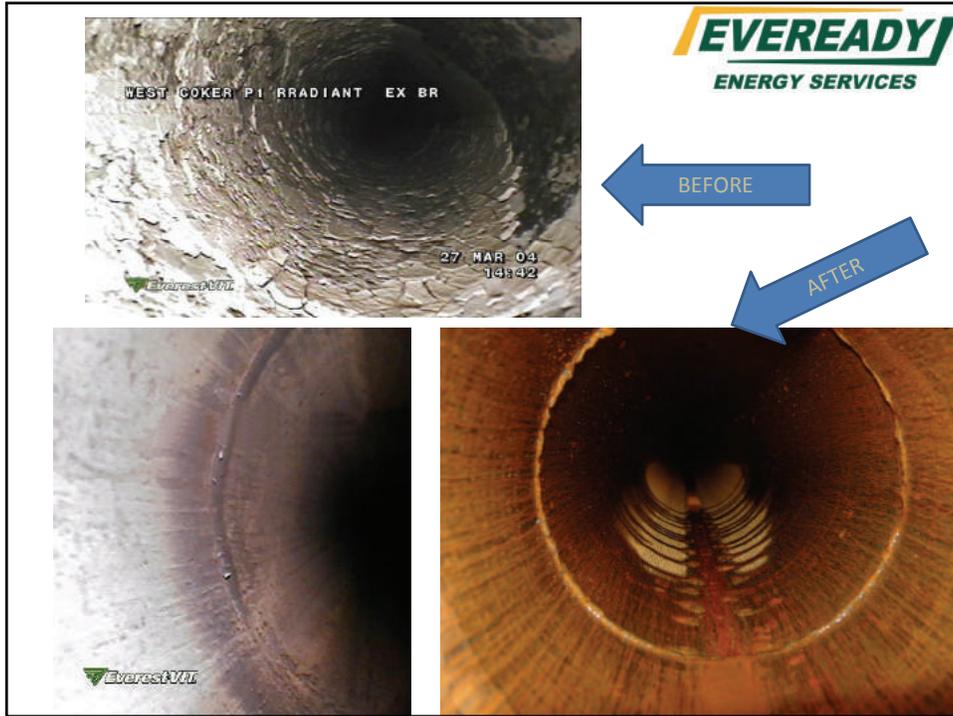

- what your group is doing while on site.
- are they following your own procedures and the refinery procedures?
- are they operating safely?

Coking.com provided the subject master expert to perform the cold-eye review.
