

TRAINING

SRU Operations and Troubleshooting, TGU Review

This course covers operations, troubleshooting preventive maintenance. You will explore start-ups and shutdowns as well as sulfur plant commissioning and initial start-up. You will receive an overview of burner management. Then you will move on to sulfur plant incinerator, sulfur pit and a review of tailgas units. Safety is included!

You will learn

SAFETY

SRU Fundamentals

SRU Operations, Troubleshooting and Preventive Maintenance

- Conversion and Recovery
- Catalyst Deactivation Mechanism
- Recovery Losses
- Process Equipment
- Start-up and Shutdown

Thermal Oxidizer

SRU Tail Gas Unit Overview

Dry Bed Process (Sulfreen, CBA, MCRC, Superclaus)

Wet Scrubbing Process (SCOT)

Who should attend

All who are interested in obtaining essential information on the current status of the sulfur recovery processes and operating practice. This course will assist all disciplines including process engineers, project engineers, mechanical engineers, facility engineers and SRU operators or any others that are willing to attend and obtain more information in their field.

Testimonials

"I went to Noel's training course for SRUs when I was first getting involved with the refining industry. His detailed review of the processes and overview of troubleshooting have made me the go-to individual at my company for sulfur recovery unit problems."

Stephen Karns

Application Specialist | Refineries & Petrochemicals

HarbisonWalker International

"Most people attend the seminars because they want to learn something they can take home with them and actually put to use. Noel is one of the best instructor's I have come across in the sulfur world who can help you understand what you came to learn."

Vaughan Birch

SRU Supervisor

NCRA

Los Angeles, California
MicroTek

Dec. 6-7, 2017

Training starts at 8:00am and finishes at 5:00pm. The program includes lunch and breaks. Attendees also receive a training manual that can serve as a valuable office reference. Dress code is casual.

Instructor

Noel Vicente

has extensive knowledge and experience in the sulfur recovery industry having worked with Sulfur Recovery Engineering, Sulfur Engineering Solutions, and now Sulfur Unit a part of Refining Community.

Noel has worked in all aspects of the Sulfur Recovery Unit such as Analytical and Field Testing, Operations and Troubleshooting, Pre-Commissioning and Commissioning, Process Engineering and has been involved with the start-up/shutdown of various refineries and gas plants worldwide.

On top of his credentials, Noel is an experienced instructor/trainer, who is able to make difficult concepts easy to understand for all. He conducts onsite training for sulfur plant operators and key staff for refineries and sour gas processors around the world. Noel also teaches fundamental engineering theory review courses to foreign trained engineers.
