

Coker Job Shadowing Sinclair and LyondellBasell

A New Coker start-up

No Coker experience and very few of the group had any refinery background.

This example of open communication allowed the 'New Operators' to job shadow at a working Coker that has two - 4 drum Coker units

The New operators gained knowledge on routine duties required of a Coker operator

They also witnessed good examples of Safety in the unit, Lock-Out Tag-Out of equipment and Housekeeping.
