

REFCOMM[®]

MUMBAI 2019

RefComm is the premier technical forum for project and process engineers, operators, maintenance, and other leaders to share knowledge and ideas relating to Delayed Coking.

Delayed Coking Unit (DCU)

We will be discussing coker safety and reliability, drum de-heading safety, operations best practices, targeting more liquid yield, DCU material balance, steam purge valves, lockout/tagout, feed, decoking, and more.

Training

Delayed Coker Operations and Reliability

Mon-Tue, 18 – 19 November 2019 with Gary Pitman

For new and experienced workers who want to broaden their understanding of the delayed coker unit.

Coker Process, Design, and Troubleshooting

Mon-Tue, 18 – 19 November 2019 with Evan Hyde

This two-day course delves deeper into the delayed coker from a process, design, and troubleshooting perspective.

Mechanical Integrity and Reliability of Coke Drums

Mon-Tue, 18 – 19 November 2019 with Dr. Mahmood Samman

Hone skills needed to understand coke drum mechanical and structural failure modes, manage their integrity in an efficient manner and improve reliability, performance, and safety.

With the volatile crude oil environment, you need to leverage technology to achieve success.

Examine case studies, network informally to build relationships, share lessons learned, evaluate strategies and explore innovations. Increasing your knowledge will spark your productivity and enhance your competitive advantage.
